**WARNING !
ACHTUNG !
AVERTISSEMENT !
ATTENZIONE !**

WARNING !

*Never spin a bearing with compressed air.
The rollers may be forcefully expelled creating a risk of serious
bodily harm.
Proper maintenance and handling practices are critical.
Failure to follow installation instructions and to maintain
proper lubrication can result in equipment failure, crea-
ting a risk of serious bodily harm*

ACHTUNG !

*Drehen Sie niemals ein Lager mit Druckluft. Der Luftdruck kann die Rollen mit großer
Geschwindigkeit herausschleudern und schwere Verletzungen verursachen. Eine
fachgerechte Lagerwartung und -handhabung ist von großer Bedeutung. Fehler bei
Wartung oder Schmierung können zu Ausfällen des gesamten Lagersystems und
damit zu ernsthaften Schäden führen.*

AVERTISSEMENT !

*Ne faites jamais tourner un roulement avec de l'air comprimé. La force de l'air com-
primé risque d'éjecter les rouleaux et de provoquer de sérieuses blessures. Les
opérations d'entretien et de manutention des roulements doivent être menées avec
soin. Le non respect des recommandations de montage et de lubrification peuvent
provoquer des dommages aux équipements et par voie de conséquence des risques
de blessures corporelles graves.*

ATTENZIONE

*Non far mai ruotare un cuscinetto con aria compressa. La forza dell'aria compressa
può far espellere i rulli ad alta velocità, creando il rischio di danni alle persone. Una
corretta manutenzione e manipolazione risultano fondamentali. Errori nel seguire le
istruzioni di installazione ed una impropria manutenzione possono creare danni agli
impianti, con il rischio di danni alle persone.*

GB Headquartered in Canton, Ohio, USA, The Timken Company is a leading international manufacturer of highly engineered bearings, alloy and specialty steels and components, as well as related products and services. With operations in 24 countries, the company is globally structured to focus on the following markets:

- Automotive (passenger cars, light trucks, commercial vehicles)
- Aerospace & super precision
- General industrial and mobile equipment
- Rail
- Emerging markets
- Specialty steel
- Precision steel components
- Alloy steel

Staffed by approximately 20,500 highly skilled employees, the company has facilities around the world to meet the global needs of customers.

- Research centers in North America, Europe and Asia.
- Over 30 bearing plants in Brazil, Canada, China, France, India, Italy, the Netherlands, Poland, Romania, Singapore, South Africa, the UK and the USA.
- 8 steel plants in the USA (including the ultra-modern Faircrest steel plant) and one in Desford, England.

F Basée aux Etats Unis à Canton, Ohio, la Société Timken est un fabricant international leader pour les roulements à forte valeur ajoutée, les aciers alliés et spéciaux et composants, ainsi que les produits et services associés. Grâce à sa présence dans 24 pays, la société est structurée globalement pour cibler les marchés suivants :

- Transport (véhicules de tourisme, utilitaires légers et poids lourds)
- Aéronautique & précision
- Equipements industriels, engins de chantier et machines agricoles.
- Ferroviaire
- Marchés émergents
- Aciers spéciaux
- Composants de précision en acier
- Aciers alliés

La société emploie près de 20 500 personnes hautement qualifiées, réparties sur ses différents sites à travers le monde afin de répondre à l'ensemble des besoins de ses clients :

- Centres de recherche en Amérique du Nord, Europe et Asie.
- Plus de 30 usines de fabrication de roulements au Brésil, Canada, Chine, France, Inde, Italie, Pays Bas, Pologne, Roumanie, Singapour, Afrique du Sud, Grande Bretagne et Etats Unis.
- 8 aciéries aux Etats Unis (dont l'usine ultra moderne de Faircrest) et une à Desford en Grande Bretagne.

TIMKEN

WORLDWIDE...

D Die Timken Company mit Sitz in Canton, Ohio, USA, ist ein führender internationaler Hersteller von hoch entwickelten Wälzlagern, legierten und Spezialstählen sowie komplementären Produkten und Dienstleistungen. Das Unternehmen mit Hauptsitz in Canton, Ohio/USA, beschäftigt weltweit 20.500 hoch qualifizierte Mitarbeiter in 24 Ländern und beliefert folgende Marktsegmente:

- Automobilindustrie - Personenwagen, leichte und schwere Nutzfahrzeuge
- Luft- und Raumfahrt und Präzisionsteile
- Allgemeiner Maschinenbau
- Schienenfahrzeuge
- Aufstrebende Märkte
- Spezialstähle
- Präzisionsstahlbauteile
- Edelstahl

Um den globalen Anforderungen auf Kundenseite zu entsprechen, ist das Unternehmen weltweit präsent.

- Forschungszentren in Nordamerika, Europa und Asien.
- Mehr als 30 Wälzlagerwerke in Brasilien, Kanada, China, Frankreich, Indien, Italien, Holland, Polen, Rumänien, Singapur, Südafrika, Großbritannien und USA.
- 8 Stahlwerke in den USA, darunter das hochmoderne Stahlwerk in Faircrest und ein Werk in Desford, England.

I Con sede a Canton, Ohio, USA, la Società Timken è un produttore leader internazionale di cuscinetti ad alto contenuto tecnologico, di acciai speciali e legati e componenti in acciaio, come pure prodotti e servizi collegati. Con attività in 24 paesi, la società è strutturata globalmente per focalizzare il suo impegno sui seguenti mercati:

- Automotive (autovetture, veicoli commerciali leggeri e pesanti)
- Aerospaziale e super precisione
- Industria generale ed equipaggiamenti "mobile"
- Ferroviario
- Acciai speciali
- Componenti di precisione in acciaio
- Acciai legati

Con circa 20.500 dipendenti altamente specializzati, la società dispone di sedi in tutto il mondo per soddisfare le esigenze globali dei clienti.

- Centri ricerche in Nord America, Europa e Asia.
- Oltre 30 stabilimenti di cuscinetti in Brasile, Canada, Cina, Francia, India, Italia, Olanda, Polonia, Romania, Singapore, Sud Africa, Inghilterra e Stati Uniti.
- 8 acciaierie negli Stati Uniti (compresa l'acciaieria ultra moderna di Faircrest) e una a Desford, Inghilterra.

THE TAPERED ROLLER BEARING : CONCEPT

About 70 % of all commercial road vehicles - trucks, lorries, coaches, trailers - are equipped with tapered roller bearings, because of their superior adjustment, durability and performance characteristics.

It is false economy to fit any but the finest quality bearings, such as those manufactured by THE TIMKEN COMPANY which, with adequate maintenance, will give maximum mileage.

MAINTENANCE OF WHEEL BEARINGS

The instructions for the inspection and replacement of tapered roller bearings all have a very positive aim : to minimise the length of time a vehicle is out of action.

A careful study of the following instructions and recommendations will ensure that failure due to poor maintenance is a thing of the past.

Above all else, it is important to follow the maintenance recommendations of the vehicle and axle manufacturers.

LE ROULEMENT A ROULEAUX CONIQUES : CONCEPTION

Environ 70 % des roulements de véhicules utilitaires sont des roulements à rouleaux coniques. Les roues des poids lourds et des remorques sont même équipées exclusivement de roulements à rouleaux coniques.

La pratique journalière le confirme : seul un produit de qualité, tel que le roulement à rouleaux coniques TIMKEN, assure un kilométrage maximal sous réserve d'un entretien adéquat.

ENTRETIEN DES ROULEMENTS DE ROUES

Les indications réunies ici pour la vérification et le remplacement des roulements à rouleaux coniques ont toutes un but bien précis : réduire au minimum les temps d'immobilisation du véhicule.

Si on observe scrupuleusement les indications et les recommandations suivantes, les défaillances de roulements dues au manque d'entretien (et ainsi les immobilisations onéreuses) feront définitivement partie du passé.

Ceci est valable avant tout si on observe également les prescriptions d'entretien des constructeurs de véhicules et d'essieux.

DAS KEGELROLLENLAGER AUFBAU

Rund 70 % aller Wälzlager in Nutzfahrzeugen sind Kegelrollenlager. In den Rädern vor allem schwerer Lkw und Anhänger kommen sogar ausschließlich Kegelrollenlager zum Einsatz.

Die tägliche Praxis bestätigt immer wieder : nur ein Qualitätsprodukt wie das TIMKEN Kegelrollenlager gewährleistet, in Verbindung mit sachgemäßer Wartung eine maximale Kilometerleistung.

WARTUNG DER RADLAGER

Die hier zusammengestellten Hinweise für Überprüfung und Austausch von Kegelrollenlagern dienen einem wichtigen Zweck : der Reduzierung vermeidbarer Stillstandszeiten auf ein Minimum.

Werden die nun folgenden Hinweise und Anregungen konsequent beachtet, gehören wartungsbedingte Lagerausfälle (und damit teure Stillstandszeiten) endgültig der Vergangenheit an.

Dies gilt vor allem dann, wenn gleichzeitig auch die Wartungsvorschriften der Fahrzeug- bzw. Achsenhersteller gewissenhaft befolgt werden.

CUSCINETTI A RULLI CONICI: CONCETTO

Circa il 70 % di tutti i veicoli stradali per il commercio-Camion-Furgoni-Autobus-Rimorchi, sono equipaggiati con cuscinetti a rulli conici, per la loro superiore adattabilità, durata e performance.

È dimostrato che, risparmio non si ottiene con economici ma con cuscinetti di qualità, come quelli prodotti da The Timken Company che, con l'adeguata manutenzione, forniranno la massima durata.

MANUTENZIONE DEI CUSCINETTI PER RUOTA

Le istruzioni l'ispezione e la sostituzione di cuscinetti a rulli conici hanno come scopo principale quello di ridurre al minimo il tempo di inutilizzo di un veicolo.

Un attento studio delle seguiti istruzioni e raccomandazioni renderà i problemi causati da scorsa manutenzione una cosa del passato.

È di fondamentale importanza seguire le raccomandazioni e la manutenzione del veicolo e del costruttore di assali.

REEMPLACEMENT DES ROULEMENTS
A ROULEAUX CONIQUES
AUSTAUSCH VON KEGELROLLENLAGERN
SOSTITUZIONE DI UN
CUSCINETTO A RULLI CONICI

8

CONCEPT CONCEPTION AUFBAU CONCETTO

1 The tapered roller bearing consists of an inner race or cone (a), an outer race or cup (b), a certain number of tapered rollers (c) and a cage (d), whose principal function is to maintain a constant spacing between the rollers. The rollers and the cone form an integral unit and cannot be separated.

1 Le roulement à rouleaux coniques est constitué d'une bague intérieure ou cône (a), d'une bague extérieure ou cuvette (b), d'un certain nombre de rouleaux coniques (c) et d'une cage (d), dont le rôle principal est de maintenir un écartement constant entre les rouleaux. Les rouleaux et le cône forment une unité indémontable.

1 Das Kegelrollenlager besteht aus einem Innenring (a), einem Außenring (b), einer Anzahl Kegelrollen (c) und einem Käfig (d), dessen Hauptaufgabe es ist, die Rollen auf gleichem Abstand zu halten. Die Rollen bilden mit dem Innenring eine unlösbare Einheit.

1 Il cuscinetto a rulli conici è costituito da una pista interna cono (a), o coppa (b), un certo numero di rulli conici (c) e da una gabbia, la cui funzione principale è di mantenere uno spazio costante tra i rulli. I rulli ed il cono costituiscono un assieme e non possono essere separati.

INSPECTION VERIFICATION ÜBERPRÜFUNG ISPEZIONE

2 Before disturbing the wheel bearings carry out the following checks:

- Jack the wheel clear of the ground. Check there is no brake pad or brake shoe interference.

2 Avant toute intervention sur les roulements de roues, il faudrait procéder aux vérifications préalables suivantes :

- Soulever la roue du sol, sans oublier de libérer les freins.

2 Jeglichem Eingriff an der Radlagerung selbst sollten grundsätzlich folgende Überprüfungen vorangehen :

- Das Rad wird vom Boden abgehoben. Freistellung der Bremsen beachten.

2 Prima di intervenire sui cuscinetti delle ruote eseguire le seguenti verifiche:

- Sollevare la ruota da terra senza dimenticare di liberare i freni.

3 Rotate the wheel slowly. Check there is no roughness or resistance to rotation.

3 Faire subir une rotation lente à la roue. Vérifier les éventuels points de rotation dure et de résistance.

3 Das Rad wird langsam gedreht. Auf rauhen Lauf bzw. Widerstände achten.

3 Ruotare lentamente la ruota e verificare che non vi sia resistenza alla rotazione.

4 Rotate wheel rapidly. Check there is no rumble, rattle or high pitched noise.

4 Faire subir à la roue une rotation rapide. Ecouter les bruits tels que broutage et cognements.

4 Das Rad wird schnell gedreht. Auf Geräusche wie Rattern und Klopfen achten.

4 Ruotare velocemente la ruota e verificare che non vi siano rumori particolari, o acuti.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

5 The best method of measuring the bearing setting is by using a dial indicator (1 micrometer precision).

Fix the base of the dial indicator on the wheel hub and place the pointer on the front face of the spindle.

Check that this movement is not due to play in the suspension joints.

Examine the area behind the seal.

Check there is no grease or oil leakage.

If the above checks prove satisfactory there is no need to disturb the wheel bearings.

IF BEARING DAMAGE IS SUSPECTED, all bearing parts as well as the seal must be replaced.

The following instructions refer only to the replacement of tapered roller bearings in commercial vehicle non-driven wheels requiring manual adjustment.

5 Le meilleur moyen de mesure du roulement est obtenu à l'aide d'un comparateur (précision 1/100 mm).

Le support du comparateur est fixé sur le moyeu de la roue et son palpeur est placé sur la face avant de la fusée.

S'assurer que ce déplacement ne provient pas par exemple, des articulations de la suspension de roue.

Vérifier qu'il n'y a pas de fuite d'huile ou de graisse derrière le joint d'étanchéité.

Si les opérations décrites ci-dessus se déroulent de manière satisfaisante, on n'interviendra pas sur les roulements de la roue.

Si toutefois, on soupçonne une détérioration de roulements, il faudra remplacer tous les éléments du roulement, ainsi que les joints.

Les instructions suivantes concernent exclusivement le remplacement des roulements à rouleaux coniques de roues sur les essieux libres de véhicules utilitaires.

5 Die Lagereinstellung kann am besten mit einer Meßuhr (Genauigkeit 1/100mm) überprüft werden.

Meßuhrenhalter an der Radnabe befestigen. Meßuhrstift gegen die Stirnfläche des Achsschenkels setzen.

Sicherstellen, daß solche Bewegungen nicht z.B. aus Gelenken der Radaufhängung resultieren !

Feststellen, ob im Bereich hinter der Dichtung Fett oder Öl austritt.

Sind die beschriebenen Schritte zufriedenstellend verlaufen, so sollte die Radlagerung unangetastet bleiben.

Besteht jedoch der Verdacht auf einen Lagerschaden, so sollten alle Lagerteile und die Dichtung ausgetauscht werden.

Die folgenden Hinweise beziehen sich ausschließlich auf den Austausch von Radlagern (Kegelrollenlagern) in nichtangetriebenen Rädern von Nutzfahrzeugen.

5 Il metodo migliore per misurare la registrazione dei cuscinetti si ottiene utilizzando un comparatore millesimale. Fissare la base del supporto del comparatore sul mozzo della ruota e posizionare il palpatore sulla parte frontale del fusello.

Verificare che questo movimento non provenga da giochi presenti nei giunti dell'ammortizzatore..

Esaminare l'area posteriore alla garnizione interna e verificare che non vi siano perdite di lubrificante.

Se le operazioni sopra descritte daranno esito positivo, non vi sarà la necessità di smontare la ruota ed il relativo cuscinetto.

Se si sospetta un danneggiamento del cuscinetto, lo stesso nonché la garnizione dovranno essere sostituiti.

Le seguenti istruzioni si riferiscono esclusivamente alla sostituzione di cuscinetti a rulli conici, montati su ruote libere di veicoli commerciali, che richiedono una registrazione manuale.

REPLACEMENT OF TAPERED ROLLER BEARINGS REMPACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

6 Remove the grease cap, split pin and adjusting nut and take the wheel from the spindle, complete with seal and the outer bearing cone. In certain wheel designs the seal must be removed before the removal of the inner bearing cone.

Using a cup driver or unhardened mild steel bar, drive out the cups from the wheel hub. (Brass or hardened steel bars or drifts can cause damage to the bearing).

Remove old lubricant from the hub assembly and spindle and clean with paraffin.

Carefully inspect the spindle and hub for scoring and bruising of bearing seats and damage to spindle threads.

6 Après avoir enlevé le capuchon, la goupille de sécurité et l'écrou de réglage, la roue est retirée de la fusée avec le joint et le cône du roulement extérieur.

Suivant le type de construction, il faut retirer le joint avant de démonter le cône intérieur (côté véhicule).

Pour extraire les cuvettes du moyeu de la roue, on doit utiliser des outils appropriés en acier doux (un jet en acier non trempé). Les résidus de graisse doivent être enlevés, le moyeu et la fusée doivent être soigneusement nettoyés.

La fusée de roue et le moyeu de la roue seront soigneusement inspectés aux emplacements des joints, aux portées du roulement et du filetage pour y détecter d'éventuelles inégalités, entailles ou bavures.

6 Nach Entfernen der Endkappe, der Sicherung und der Einstellmutter wird das Rad mitsamt der Dichtung und den Lagerinnenteilen vom Achsschenkel heruntergezogen.

Das äußere Innenteil mit Rollen und Käfig kann sofort ausgebaut werden. Je nach Konstruktion muß erst die Dichtung entfernt werden, bevor das wagenseitige Innenteil ausgebaut werden kann. Zum Austreiben der Außenringe aus der Radnabe sollten entsprechende Werkzeuge oder Dorne aus weichem Stahl verwendet werden. Fettreste sind zu entfernen, die Radnabe und der Achsschenkel sorgfältig zu reinigen.

Der Achsschenkel und die Radnabe müssen im Bereich der Dichtung, der Lagersitze und des Gewindes sorgfältig auf Unebenheiten, Kerben und Grate inspiziert werden.

6 Rimuovere il tappo, la copiglia e la ghiera scanalata e togliere la ruota dal fusello completa della guarnizione e dell'anello interno del cuscinetto esterno.

In alcuni tipi di ruote, la guarnizione dev'essere rimossa prima di smontare l'anello

interno suddetto.

Per estrarre l'anello esterno dal mozzo della ruota, si dovrà utilizzare un apposito utensile guida in acciaio dolce (utilizzando ottone o acciaio temperato si potrebbero causare danni al cuscinetto).

I residui di grasso lubrificante dovranno essere tolti ed il tutto dovrà essere accuratamente ripulito e lavato

Ispezionare con attenzione sia il fusello che il mozzo ruota verificando l'eventuale presenza di abrasioni o ammaccature sulle sedi a contatto del cuscinetto, così come eventuali danneggiamenti del filetto.

7 All high spots should be removed by careful filing or scraping.

7 Toutes les inégalités devront être rectifiées.

7 Alle Unebenheiten müssen entfernt werden.

7 Tutte le imperfezioni dovranno essere rimosse.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

8 IMPORTANT : Follow the manufacturer's recommendations for permissible wear on the spindle diameters.

Mounting of cups : The cups are press-fitted with the cup broad face towards the inside. Normally a cup driver is used - this must be made from unhardened steel.

8 IMPORTANT : Respecter les recommandations du constructeur concernant l'usure admissible des diamètres de la fusée.

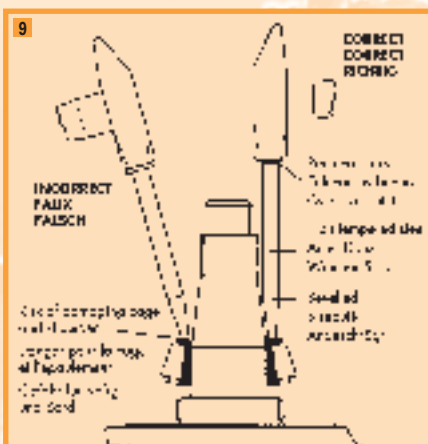

Montage des cuvettes : Les cuvettes sont emmanchées à force, le grand côté vers l'intérieur. Pour ce faire on doit utiliser normalement des outils d'emmanchement usuels du commerce en acier doux

8 WICHTIG : Die Empfehlungen des Herstellers über zulässigen Abrieb der Achsschenkel Durchmesser beachten !

Einbau der Außenringe : Die Außenringe werden mit der großen Stirnfläche nach innen eingetrieben. Hierzu sollten im Regelfall handelsübliche Treibwerkzeuge oder aber Dorne aus weichem, ungehärtetem Stahl verwendet werden.

8 ATTENZIONE: seguire le raccomandazioni del costruttore per quanto riguarda l'usura massima ammessa dei diametri del fusello.

Montaggio degli anelli esterni: gli anelli esterni sono montati forzati con il piano grande rivolto verso la parte interna del mozzo. Per fare ciò si dovrà utilizzare un apposito utensile guida in acciaio dolce.

9 NEVER use a cone to press fit a cup into housing

If a driver is not available, and a bar is used instead, make sure it is made from unhardened steel and follow the correct method shown in figure 9 for the mounting of cones.

9 Les cuvettes ne doivent jamais être emmanchées à l'aide des cônes.

Si on ne dispose pas d'outils appropriés, la méthode indiquée comme "correcte" sur la figure 9 (montrant le montage des cônes) devra être appliquée en prenant tous les soins nécessaires.

Il faut particulièrement veiller à ce que la bague ne soit pas emmanchée de travers.

9 Außenringe dürfen niemals über die Innenringe eingetrieben werden !

Falls keine geeigneten Werkzeuge zur Verfügung stehen, sollte die in Abb. 9 unter "richtig" dargestellte Methode mit größter Sorgfalt ausgeführt werden.

Es ist besonders darauf zu achten, daß der Lagerring nicht einseitig (und damit schief !) aufgetrieben wird.

9 NON UTILIZZARE MAI un anello interno per il montaggio dell'anello esterno.

Per il montaggio degli anelli interni, qualora un utensile guida non sia disponibile, si potrà utilizzare una barra di acciaio dolce (non temprato) opportunamente sagomata, seguendo il metodo indicato come "corretto" nella Fig. 9.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

10 Make sure that the cup is properly seated against the wheel hub shoulder .

10 Veiller à ce que la cuvette s'appuie parfaitement contre l'épaulement du moyeu de la roue.

10 Auf einwandfreie Anlage der Außenringe gegen die Schulter in der Radnabe achten.

10 Assicurarsi che l'anello esterno sia completamente a contatto della battuta d'appoggio del mozzo ruota.

11 Smear both cups with grease and fill the space between the cups with grease.

11 Mettre de la graisse sur les cuvettes et dans l'espace les séparant dans le moyeu.

11 Der Freiraum zwischen den Außenringen in der Radnabe wird mit Fett gefüllt oder ausgestrichen.

11 Spalmare del grasso lubrificante sia sui due anelli esterni, sia nello spazio compreso fra gli stessi.

12 Fit the spindle tube seal.

12 Monter le joint de la fusée d'essieu.

12 Die Dichtung wird (in diesem Falle) auf dem Achsschenkel montiert.

12 Montare la guarnizione di tenuta interna sul fusello, avendo cura di posizionare il labbro nella giusta direzione.

13 Grease the inner cone assembly and install on the spindle.

13 Après avoir graissé l'ensemble cône-rouleaux intérieur, monter celui-ci en position sur la fusée.

13 Das innere Innenteil wird gefettet und auf den Achsschenkel geschoben.

13 Dopo aver ingrassato l'anello interno ed i rulli, montarlo sul fusello.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

14 It is very important that the grease penetrates under the cage. It is easier to introduce the grease from the larger end of the cone and to push it all around the spaces between the cage and the cone until it oozes out the other side.

14 Il est très important que la graisse pénètre à l'intérieur du roulement, c'est-à-dire sous la cage. On y parvient le plus facilement en introduisant la graisse sur la face avant, sur tout le pourtour, et en la poussant dans l'espace entre la cage et le cône jusqu'à ce qu'elle ressorte de l'autre côté.

14 Es ist von größter Wichtigkeit, daß das Fett ins Innere des Lagers, d.h. unter den Käfig gelangt. Dies gelingt am besten, wenn das Fett auf der großen Stirnseite rundum so lange in den Spalt zwischen Käfig und Innenring gedrückt wird, bis es auf der anderen Seite austritt.

14 E' molto importante che il grasso sia spinto all'interno dell'anello, vale a dire sotto la gabbia. Risulterà più facile introdurre il grasso dalla parte del diametro maggiore dell'anello interno, facendolo penetrare nello spazio fra la gabbia ed il bordo spallamento, fino a quando non uscirà dalla parte opposta.

15 Fit seal with lip pointing in the right direction. Slide hub assembly onto spindle being careful not to damage the seal.

15 Le moyeu de la roue est introduit par dessus la fusée. Suivant le type d'étanchéité il faut particulièrement veiller à ne pas blesser les lèvres du joint lors de l'emmanchement.

15 Die Radnabe wird über den Achsschenkel geschoben. Je nach Dichtungsart ist besondere Vorsicht beim Aufschieben der Dichtlippe auf den Achsschenkel geboten.

15 Montare il mozzo ruota e la guarnizione di tenuta esterna sul fusello, facendo ancora una volta attenzione a posizionare il labbro di quest'ultima nella giusta direzione

16 Grease the outer cone.

16 Procéder au graissage du cône extérieur.

16 Das äußere Innenteil mit Rollen und Käfig wird gefettet.

16 Ingrassare il secondo anello interno seguendo le istruzioni così come al punto 16.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROUEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

17 Before mounting, the wheel hub must be aligned with the axle centre to enable the cone to be fitted without undue force.

17 Avant le montage, le moyeu de la roue doit être aligné avec l'axe de l'essieu pour pouvoir monter le roulement sans forcer.

17 Vor der Montage wird die Radnabe zur Achse ausgerichtet, damit eine zwanglose Montage des Lagers erfolgen kann.

17 Prima del montaggio il mozzo ruota dovrà essere allineato con l'asse del fusello per poter montare l'anello interno senza forzare.

18 The parts necessary for adjustment, such as the slotted hexagon nut, lock-nut, etc., are pulled up until they are seated.

18 Les éléments nécessaires au réglage, tels que les écrous à créneaux, contre-écrous, etc., sont vissés et amenés en appui.

18 Die zur Einstellung erforderlichen Teile, z.B. Kronenmutter, Kronenmutter usw. werden aufgeschraubt und zur Anlage gebracht.

18 I particolari necessari alla registrazione dei cuscinetti, come la ghiera esagonale scanalata di serraggio, o la ghiera di registrazione e la controgghiera, dovranno essere montate fino a pacco.

19 Adjustment of single row bearings: Tighten the adjusting nut while rotating the wheel until a definite resistance to rotation occurs.

19 Réglage des roulements à une seule rangée :

En tournant simultanément la roue, on serre l'ecrou de réglage jusqu'à ce que la roue soit légèrement freinée en rotation.

19 Einstellung einreihig angeordneter Radlager :

Bei gleichzeitigem Drehen des Rades wird die Kronenmutter usw fest angezogen, bis das Rad nur noch schwer drehbar ist.

19 Registrazione di cuscinetti a singola fila di rulli:

Facendo ruotare la ruota, avvitare la ghiera di registrazione fino ad una data resistenza alla rotazione.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

20 Slacken off the adjusting nut sufficiently to ensure proper running clearance as recommended by the vehicle manufacturer.

20 L'écrou de réglage est ensuite ramené de la valeur indiquée par le constructeur, pour que la roue tourne de nouveau librement.

20 Die Einstellmutter wird danach um einen von Herstellerseite festgelegten Wert zurückgedreht, so daß sich das Rad wieder leicht und ohne Widerstand drehen läßt.

20 Affinché la ruota giri liberamente, svitare la ghiera di registrazione del valore indicato dal costruttore del veicolo.

21 The slotted hexagon nut is locked with a split pin.

If an adjusting nut and a locknut are used, the adjusting nut must be tightened first until the bearings start to bind and then backed off sufficiently to ensure proper running clearance.

21 L'ecrou à créneaux est freiné par une goupille.

Si on utilise un écrou et un contre-écrou, serrer d'abord l'écrou de réglage jusqu'à obtenir une rotation difficile de la roue, puis desserrer l'écrou de réglage jusqu'à ce que la roue tourne de nouveau librement.

21 Die Kronenmutter wird durch einen Splint gesichert.

Bei der Verwendung einer Doppelmutter wird die Einstellmutter zunächst fest angezogen, bis sich das Rad deutlich schwerer dreht. Danach wird die Einstellmutter soweit zurückgedreht, bis das Rad sich wieder frei drehen läßt.

21 La ghiera scanalata è fissata per mezzo di una copiglia.

Se vengono utilizzate una ghiera di registrazione ed una contro-ghiera, bisognerà serrare prima la ghiera di registrazione fino a quando si noterà una leggera resistenza alla rotazione, dopodiché far arretrare la stessa, svitandola fino ad assicurare una adeguato gioco che permetta la libera rotazione della ruota.

22 In this case, the running clearance due to backing off should be slightly larger than that obtained with the slotted hexagon nut. This is because the locknut will change the adjustment due to the looseness of threads tending to reduce the bearing running clearance.

Always follow the vehicle manufacturer's recommendations !

When tightening the locknut, hold the adjusting nut with a second spanner. Final locking is done by bending the outer tab of the tongued washer into the locknut slot.

22 Dans ce cas, la valeur de desserrage de l'écrou est légèrement plus grande qu'avec un écrou à créneaux. Lors du serrage du contre écrou, le jeu du roulement est réduit davantage par suite du rattrapage du jeu entre filets du filetage.

Suivre les recommandations du constructeur !

Lors du serrage du contre-écrou, l'écrou de réglage est retenu par une deuxième clé. Après serrage du contre-écrou, la rondelle de sécurité est repliée en conséquence entre les deux écrous.

REPLACEMENT OF TAPERED ROLLER BEARINGS REEMPLACEMENT DES ROULEMENTS A ROULEAUX CONIQUES AUSTAUSCH VON KEGELROLLENLAGERN SOSTITUZIONE DI UN CUSCINETTO A RULLI CONICI

22 Der Rückstellwinkel ist in diesem Falle etwas größer als bei der Kronenmutter, da durch das nun folgende Kontern aufgrund des Gewindespiels mehr Luft aus der Lagerung herausgenommen wird.

Empfehlungen des Herstellers befolgen !

Beim Kontern wird die Einstellmutter mit einem zweiten Schlüssel gegengehalten. Nach dem Kontern wird das Sicherungsblech zwischen den beiden Muttern entsprechend umgelegt.

22 In quest'ultimo caso, il gioco risultante dall'allentamento del serraggio della ghiera di registrazione, dovrà essere leggermente superiore rispetto a quello necessario utilizzando la ghiera scanalata.

Ciò è dovuto al fatto che, una volta in esercizio, il gioco presente nel filetto della ghiera tenderà a diminuire, riducendo a sua volta il gioco interno del cuscinetto. Seguire sempre le raccomandazioni del costruttore del veicolo. Mentre si blocca la contro-ghiera, la ghiera di registrazione dovrà essere mantenuta in posizione da una seconda chiave. Dopo il serraggio della controgghiera, la linguetta della rondella di sicurezza dovrà essere ripiegata.

23 Then move the wheel axially in both directions while rotating it 30° from left to right. The bearing endplay corresponds to the total reading taken from the indicator.

The bearings of non-driven wheels of commercial vehicles normally have an endplay of 0.025mm to 0.150mm, but check the vehicle manufacturer's recommendations.

Finally fill the hub cap with grease and replace.

23 (Si on dispose d'une bille d'acier, on peut l'introduire, enduite de graisse, dans le trou de centrage de la fusée. On appuie alors le palpeur du comparateur contre la bille).

La roue est alors déplacée axialement dans les deux sens par rapport au comparateur en la faisant simultanément tourner d'environ 30° à gauche et à droite. Le jeu du roulement correspond à la lecture totale relevée sur le comparateur.

Les roulements des roues folles de véhicules utilitaires comportent un jeu axial (pas de basculement) d'environ 0,025 - 0,15mm. Se reporter aussi aux instructions du constructeur.

Le capuchon est rempli de graisse et remis en place.

23 (Falls vorhanden, kann eine Stahlkugel mit Fett in die Zentrierbohrung des Achsschenkels gedrückt werden. Gegen die Kugel wird dann der Meßuhrstift gesetzt).

Das Rad in beide Richtungen axial zur Meßuhr verschieben und dabei um einen Winkel von etwa 30° hin-und herdrehen. Das Spiel der Lager entspricht der gesamten Meßuhrablesung.

Die Lager nichtangetriebener Räder von Nutzfahrzeugen werden auf ein Axialspiel (nicht Kippspiel) von etwa 0,025 - 0,15mm eingestellt. Siehe auch Anweisung des Herstellers !

Die Endkappe wird mit Fett gefüllt bzw. ausgestrichen und danach montiert.

23 Muovere la ruota assialmente ruotandola contemporaneamente di 30° da destra verso sinistra e viceversa. Il gioco interno del cuscinetto corrisponderà alla lettura totale effettuata dal comparatore precedentemente montato sul mozzo come al punto 7. I cuscinetti applicati su ruote folli di veicoli commerciali sono normalmente registrati con un gioco assiale da 0.025mm a 0.150mm, verificare comunque le raccomandazioni del costruttore del veicolo. Riempire infine il tappo di grasso e rimontarlo.
